Mobile: (+92) 312 0421484 ◇ Lahore, Pakistan

EDUCATION

Information Technology University

Bachelors of Science in Computer Science

Lahore, Pakistan

Aug 2022 - July 2026

Lahore College for Women University

FSc Pre-engineering

Lahore, Pakistan

Aug 2020 - May 2022

SKILLS

Languages

C++, Python, SQL, HTML, CSS, JavaScript

Frameworks

Express.js, React, Node.js

Tools and Platforms

Postman, Visual Studio, VS Code, Cursor, GitHub, MySQL, MongoDB, Overleaf

APPRENTICESHIP

MindStorm Studios

Game Programmer | [Certificate](#)

Lahore, Pakistan

Jun 2023 - Aug 2023

- Developed a game in Unity using C# in collaboration with 3 peers in a Rookie Game Jam.
- Delivered working prototype under time constraints, gained valuable insight into professional game development.

PROJECTS

- **Skillsprint (FYP)** | *MERN stack, Python based AI-service* Aug 2025 - ongoing
 - Building an AI-powered learning platform with ai-based content generation and human feedback integration.
 - Implementing Duolingo-style learning design for gamified, adaptive user experience.
- **Compiler Construction** | *Construction in C++ for C++ language* Aug 2025 - Nov 2025
 - Developed the compiler in these four phases: Lexical analysis, Syntax analysis, Semantic analysis, IR generation
- **Y-Net Architecture** | *Image Generation / Translation Model* Nov 2025 - Dec 2025
 - Applied a pre-trained Y-Net model for image translation on Duke and UMN datasets, including preprocessing, inference, and evaluation.
- **Airbnb clone** | *MERN stack, JWT* Nov 2024 - Dec 2024
 - Developed a simplified Airbnb clone with role-based dashboards for User and Admin.
 - Implemented JWT authentication, property listings, details pages, and booking functionality.
- **Cutlery Items Classifier** | *Artificial Neural Networks* Nov 2024 - Dec 2024
 - Built an image classification system to identify cutlery items
 - Curated and labeled custom dataset with data augmentation techniques, achieved 89% test accuracy.
- **Remote Sensing Data and Methods** | *SAR/InSAR/DInSAR* Oct 2024 - Dec 2024
 - Processed Sentinel-1 SAR data for surface deformation analysis.
 - Applied InSAR techniques including interferogram generation, coherence analysis, and phase unwrapping.
 - Implemented DInSAR workflows for displacement mapping (subsidence/landslide detection)
- **Solitaire game** | *Data Structures, Object Oriented Programming* Nov 2023 - Jan 2024
