EDUCATION

Bachelors of Science in Computer Science, Information Technology University of the Punjab 2022 - 2026

SKILLS SUMMARY

Languages	C++, Python, C#, SQL, HTML, CSS, JS
Tools and Platforms	Postman, VS, VS Code, Github, MySQL, Word, Excel, PowerPoint, Overleaf
Frameworks	Bootstrap, Tailwind CSS, Express.js
Tech Stack	MERN stack
Soft Skills	Communication, Adaptability, Work Ethic
Foreign languages	English, Arabic, Turkish
Hobbies	Book Reading, Travelling, Sketching

APPRENTICESHIP

Game Programmer Link	Jun 2023 - Aug 2023
MindStorm Studios	Lahore, Pakistan

- Got the idea of how a game is designed and developed from scratch.
- Developed a game in Unity using C# for gameplay logic.
- Collaborated with 3 peers in a Rookie Game Jam, delivering a working prototype under time constraints.
- Helped me decide not to choose game development as my career.

| • Responsive Web Design Link | freeCodeCamp.org |

PROJECTS

Mern-Thinkboard

- Built a note-taking website using MERN stack (ReactJS, NodeJS, MongoDB, TailwindCSS, DaisyUI, Lucide-react).
- Implemented authentication, CRUD operations, and toast notifications with react-hot-toast.
- Applied best practices: secured .env files, organized folder structure, and managed GitHub pushes.
- Learned error handling and debugging during development.

Airbnb clone

- Developed a simplified Airbnb clone using MERN stack with authentication.
- Created role-based dashboards for User and Admin.
- Implemented listings, details, and booking pages (booking page still under refinement).

Practice Portfolio Website

- Designed a portfolio using MERN stack with main, about, and contact pages.
- Embedded social media content and optimized responsiveness with media queries.
- Realized later it's better to use simple HTML/CSS/JS for lightweight portfolios.

To-Do-List App

- Built a simple to-do list app with MERN stack.
- Implemented CRUD operations with GET, POST, PUT, and DELETE requests.

Personal Portfolio Website |[Link](#)

- Developed a personal portfolio using HTML, CSS, and JavaScript only.
- A contact form in case people want to connect with me or give me feedback.
- Integrated Google Fonts and Font Awesome icons for styling.
- Deployed the website on Github pages.

HTML and CSS Projects

- Built 5 major projects: Personal Portfolio, Survey Form, Product Landing Page, Technical Documentation Page, Tribute Page.
- Gained hands-on experience with animations and responsive layouts.

JavaScript Projects

- Built apps including Calorie Counter, Date Formatter, Football Team Cards, Music Player, Rock-Paper-Scissors, Pyramid Generator, and more.
- Focused on algorithms, DOM manipulation, and event handling.

Python Projects

- Academic projects: Developed a Client-Server app and a Paintbrush-like drawing app.
- Built a Cipher (string manipulation project).
- Learned to apply different libraries for specific tasks.

C++ Projects

- Developed games in academic projects: Chess, Snake, Solitaire, TicTacToe (with AI player), Excel Sheet clone.
- Practiced OOP principles and data structure applications.

C# Project

- Built a game in Unity using C# for rookie gamejam.
- Created a calculator application with custom logic.

Database System

- Designed a Pharmacy Management System in Visual Studio (.NET).
- Used MongoDB Atlas for database handling.

Deployment Projects

- Deployed a login/signup system on AWS (EC2 Windows instance).
- Deployed the same system on Docker using Ubuntu VM.
